AJUGA	Reptans—Creeping plant with stems of blue bugles in the Spring..	1.25
ALLIUM	Cernuum—Pink globose blossoms on stems 9 to 12 inches high..	.50
	Fallax—Rosy purple blossoms on stems of 1 foot.....	.50
	Kansuense—Lovely bluebells on stems of a few inches. Very choice	1.00
	Odorum—Pink and white fragrant blossoms. 1 foot.....	1.00
	Pulchellum—Pink heads of blossoms. Lovely planted with Cam- panula rotundifolia	1.00
	Schoeneprasum—Chives of our old gardens but making a fine effect in the rockery50
ALSINE	Austriaca—Long furry foliage of lovely green. White flowers....	1.50
	Bauhinorum—Mats of fine green fur with large white blossoms. A gem	3.00
	Juniperifolia—Grows about 6 inches high, studded with small white blossoms	1.50
	Laricifolia—Lovely pure white flowers on 6 inch stems.....	1.50
ALYSSUM	"Silver Queen"—Finest variety of saxatile for border or large rock garden. Silvery yellow blossoms so profuse they fairly smother the plant. TRUE VARIETY.....	1.25
ANEMONE	Borealis—Lovely thing from Alaska and Siberia. Beautiful snowy blossoms, tinged blue at base, each on its own 6 inch stem	3.50
	Halleri—Related to pulsatilla, with silky foliage and rich violet flowers	3.00
	Pulsatilla—Large purple flowers, shaggy with silk. Blooms in early Spring	1.25
	Pulsatilla Rubra—Same growth as Pulsatilla with reddish purple flowers	1.25
	Sylvestris—The true variety is very lovely with large white blossoms on stems of 6 inches. A gem. Much more refined and beautiful than the variety usually sent out under this name.....	1.50
	Vernalis—(Lady of the Snow)—Rare and exquisite. Large white flowers, flushed outside with violet, on stems of about 4 inches	3.50
ANTENNARIA	Neodioica—Prostrate silvery carpet, spangled with white blossoms	1.50
AQUILEGIA	Canadensis Nana—Dwarf form of our wild Columbine. Lovely for the rock garden.....	1.25
	Emperor—A new giant race of Columbines with a fine range of colors	1.25
	Hensol Harebell—Deep, vivid, violet blue flowers on stems of medium height. New and very beautiful.....	2.00
	Pyrenaica—Large, deep violet blossoms. Very dwarf. True variety from Pyrenees Mountains	2.00
	Nivea Grand—Fine white, dwarf variety.....	1.25
ARABIS	Alpina Nana—Compact growth and somewhat more dwarf than the common variety.....	1.00
	Collina—Fine new dwarf variety from the Royal Botanic Garden. White or lavender blossoms. Fine for garden.....	2.00

	Dozen
ARABIS Rosea —Forms neat rosettes of glossy leaves bearing 4 inch stems of rose colored flowers in the Spring. Not a variety of <i>Arabis alpina</i> -----	1.75
Procurrens —Prostrate growth with white blossoms on slender stems in early Spring -----	1.75
Stellaris Roseus —Similar in growth to <i>A. rosea</i> but foliage is not glossy. Another new and very choice variety from the Royal Botanic Garden -----	2.00
ARENARIA Caespitosa —Dwarf, grassy foliage spangled in Spring with small white flowers. Excellent for filling chinks in rock garden -----	1.00
Gracilis —Prostrate growth, deep green foliage. White flowers on 2 inch stems in Spring -----	1.25
Grandiflora —Large white flowers on trailing stems in early Spring -----	1.00
Montana —Tufts of lovely green with large white flowers in May and June. A gem -----	1.50
ARMERIA Juncea Alba —A rare and tiny species bearing heads of white flowers on 4 inch stems in June. Fine for rock garden -----	2.00
ARTEMISIA Frigida —Silvery spires of foliage, filmy and graceful for rock garden or border. 12 to 18 inches tall -----	2.50
ASPERULA Hexaphylla —Rare plant with fragile, 4 inch stems, set with whorls of leaves and ending in a bunch of pearly pink starry trumpets -----	2.00
ASTER Alpinus Goliath —Large purple—blue blossoms on 10 inch stems. Fine for rock garden or edge of border -----	1.25
Subcoeruleus "Florist Delight" —Giant flowers of lavender blue. New and choice -----	1.50
ASTILBE Rubra —Fine variety with massive blossoms of rose color. 4 feet. -----	3.00
Simplicifolia —Beautiful dwarf variety from Japan. Panicles of white blossoms on stems of 6 inches to 9 inches. Lovely foliage. Very rare -----	4.50
AMPELOPSIS Veitchii —The most popular climber for stone and brick walls. Good sturdy plants -----	2.50
ATRAGENE Alpina —A treasure for rambling through a low bush at the back of rock garden or border. Lovely nodding blue flowers in May and June -----	6.50
BARBAREA Rupicola —Tidy, low-growing plant with showy golden yellow blossoms. Fine carpeter -----	1.50
BELLIUM Bellidioeides —A miniature <i>Bellis perennis</i> for sandy soil and full sun. Blooms nearly all summer -----	1.75
Nivale —Similar to above with white daisies stained red underneath -----	1.75
BOCCONIA Cordata —Large plants for border or back grounds. Very showy cream-white panicles of bloom in June -----	1.00
BUDDLEIA Alternifolia —New Chinese variety. Very hardy shrub with lilac purple flowers from mid-summer to fall. Strong plants -----	2.50
Magnifica —Deep lilac flowers in long tails of bloom. Strong plants -----	1.50
Nanhoensis —New dwarf variety suitable for rock garden. Strong plants, three years old -----	1.50
CAMPANULA Barbata —Very choice variety for the rock garden. Forms a flat rosette of slightly hairy leaves around a stout tap root. Light blue bells on stems 5 or 6 inches high -----	2.50
Bellardii —Similar to <i>C. pusilla</i> with myriads of silvery blue bells from June to August. 4 inches -----	3.50
Caespitosa —Forms a central tap root from which it throws a dense cushion of leaves. From this comes a profusion of lovely hanging bells of clear blue. Exquisite -----	4.50
Elatines —Choice plant from the Cottian Alps. Slightly hairy leaves and clear violet blue bells on 3 inch stems -----	4.50
Garganica —Invaluable sun-loving rock plant. Masses of star shaped blue blossoms. 3 inches -----	2.00

	Dozen
CAMPANULA <i>Latifolia Eriocarpa</i> —A much neater and dwarfer form of the type. Flowers larger and much deeper and richer violet purple. 3 feet -----	1.50
<i>Macrorrhiza</i> —Very close to <i>C. rotundifolia</i> but having vase-shaped bells of violet in countless profusion-----	1.50
<i>Muralis</i> —Another beauty for the wall or rock garden with large cups of deep blue sitting close to the plant in great profusion	2.50
<i>Pseudo-Raineri</i> —Lovely garden hybrid with wide, saucer-shaped flowers of blue. 2 inches-----	2.75
<i>Pilosa</i> —Tufts of foliage from which rises one stalwart stem of 6 inches, bearing an enormous bell of blue, all bearded outside with a fluff of fine hairs-----	3.00
<i>Pusilla</i> —One of the loveliest. Covered with dainty bells on fairy-like stems during July and August. 3 inches-----	3.50
<i>Rotundifolia</i> —A much improved type of the Scotch Bluebell, with larger flowers and much deeper color. Blooms nearly all summer	1.25
<i>Turbinata</i> —Similar to <i>C. carpathica</i> but much better. Flat masses of light green foliage, close upon which stand huge saucer-shaped cups of blue. True variety-----	1.25
CHRYSANTHEMUM <i>Maximum</i> "Mayfield Giant"—Strong growing and free flowering Shasta Daisy-----	1.00
"Robsoni"—Narrow, tassel-like petals. New and very choice-----	1.25
"The Prince"—Flowers 5 inches across. New and choice-----	2.00
"The Speaker"—Flowers very large. New and one of the finest--	1.25
CLEMATIS <i>Recta</i> —Dwarf, shrubby variety. Large clusters of white flowers. Fine for back of borders or rock garden. 3 feet-----	1.75
<i>Recta Purpurea</i> —Foliage a lovely tone of purple. Splendid for color effects. Flowers white -----	2.00
<i>Cote d'Azure</i> —Lovely new shrubby variety from France. Grows about 3 feet high and in July is covered with beautiful, tubular blossoms of clear blue -----	2.50
<i>Graveolens</i> —Rapid growing climber with large yellow blossoms. Perfectly hardy and very lovely-----	3.50
<i>Montana Rubens</i> —Foliage reddish when unfolding. Beautiful blossoms of pink in June. Choice-----	3.50
<i>Paniculata</i> —The well known climber with pure white, very fragrant flowers in August and September. Seed pods very decorative. 2 year plants -----	1.25
<i>Tanguitica</i> —Climbing vine to 10 feet. Handsome flowers of bright yellow nearly 3 inches across-----	3.50
CORYDALLIS <i>Cheilanthisfolia</i> —Lovely fern-like foliage and spikes of yellow blossoms. 12 inches -----	2.00
CRAMBE <i>Cordifolia</i> —Splendid plant for backgrounds, shrubberies and watersides. Very fragrant white flowers in immense panicles	1.50
CYCLAMEN <i>Neapolitanum</i> —Beautiful hardy variety with flowers of pink and white in Autumn. Very attractive foliage of dark green marbled with white -----	7.50
CYTISUS —We are offering young plants of the following varieties of these charming shrubs at prices that will permit everyone to have them in the garden.	
<i>Cytisus Albus</i> —The white Portugal Broom. The only pure white. Blooms in May. 8 to 10 feet-----	2.00
<i>Alpinum</i> —(Scotch Laburnum)—Golden yellow blossoms in slender racemes 10 to 15 inches long-----	2.00
<i>Capitatus</i> —Shrub to 3 feet. Golden yellow sprays of bloom in July -----	2.00
<i>Laburnum</i> —(Golden Rain)—Tree to 20 feet. Flowers golden yellow in long racemes. Very lovely-----	2.00
<i>Nigricans</i> —Lovely golden flowers in August. 3 feet-----	2.00
<i>Purpureus</i> —Low spreading bush with soft rosy-purple flowers in May and June. Lovely for rock garden. 1 foot-----	3.00
<i>Scoparius Andreanus</i> —A beautiful sport originating in Normandy. Flowers yellow with wings of rich crimson-----	2.50

GENISTA —Rock Brooms—nearly all dwarf and very ornamental.	
<i>Aetnensis</i> —Mt. Etna Broom—slender twigged shrub, wreathed with yellow flowers in late summer and autumn. 4 to 12 feet-----	2.00
<i>Germanica</i> —Dwarf shrub about 2 feet high. Foliage dark green. Flowers yellow in terminal racemes, 1 to 2 inches long, in June	2.00
<i>Hispanica</i> —(Juncea)—The popular Spanish Broom. Dwarf, evergreen shrub, forming needle-like cushions. Yellow flowers May to July, 2 feet-----	2.00
<i>Radiata</i> —Bushy evergreen shrub to 3 feet. Terminal heads of yellow flowers throughout the summer-----	2.00
DIANTHUS	
<i>Alpestris</i> —Green tufts of foliage with fine stems spraying out and ending in rosy blossoms-----	1.25
<i>Alpinus</i> —True variety and a gem for the rock garden. Glossy green leaves and large rose flowers on 2 inch stems-----	2.00
<i>Alpinus Albus</i> —White variety of above-----	2.25
<i>Alpinus Allwoodii</i> —Larger in growth than the type, losing the close tufted habit which is one of the beauties of the true D. <i>Alpinus</i> -----	1.25
<i>Caesius</i> —The true Cheddar pink. Blue-green leaves and rose colored blossoms. 6 inches -----	1.25
<i>Caesius Arvernensis</i> —Very dwarf form with almost stemless blossoms of rose color -----	2.50
<i>Fragrans</i> —White, single pinks on stems 8 inches tall. Deliciously fragrant -----	1.50
<i>Frigidus</i> —Very dwarf, tufted habit. Lovely rose pink flowers. Choice	2.50
<i>Hoeltzeri</i> —Splendid border pink. Fine pink flowers on stems 18 inches tall -----	1.25
<i>Neglectus</i> —A treasure for the rock garden, the true variety being very scarce. Tufts of narrow foliage, covered with immense blooms of pink with yellow reverse-----	2.50
<i>Neg. Roysii</i> —Good variety but much less compact than D. <i>Neglectus</i> . Flowers are smaller and stems longer-----	1.50
<i>Sylvestris</i> —Bluish foliage, pink flowers on stems 1 foot high-----	1.50
<i>Zonatus</i> —Lovely plant with glaucous foliage and countless rosy flowers. True variety from the Royal Botanic Garden-----	4.50
DIGITALIS <i>Lanata</i> —Grey foliage and large yellow flowers in June-----	1.25
DRABA	
<i>Aizoides</i> —A gem for the rock garden. Very dwarf, thorny looking rosettes with heads of golden yellow flowers in Spring. 2 inches	3.00
<i>Brunaefolia</i> —Dwarf variety of loose habit. Yellow flowers-----	2.75
<i>Incana Adamsii</i> —Mats of grey, hoary leaves and white flowers on minute stems -----	3.00
DRACOCEPHALUM <i>Isabellae</i> —New dwarf variety of bushy habit and masses of purple-blue flowers in whorls. 9 inches-----	1.75
DRYAS <i>Sundermanni</i> —An improved and very choice variety of D. <i>octopetala</i> with large white flowers, pale yellow in bud. Very scarce. 6 inches -----	3.50
ERINUS	
<i>Alpinus Roseus</i> —Very dwarf evergreen plant with spikes of deep pink blossoms. May-June, 4 inches-----	2.00
<i>Alpinus Albus</i> —Same as above with pure white blossoms-----	2.00
ERODIUM	
<i>Corsicum</i> —Mats of downy grey leaves covered with lovely rose pink blossoms. Rare -----	4.50
<i>Macradenum</i> —Smooth green foliage, finely cut into lace and an abundance of small pink blossoms streaked with black, like a miniature Geo. Washington Geranium-----	4.50
<i>Roseum</i> —Mats of deep green foliage covered all summer through with lovely pink blossoms, veined deeper-----	4.50
ERYNGIUM	
<i>Amethystinum</i> —Distinct glistening blue blossoms. 2 feet-----	1.50
<i>Bourgati</i> —Bright steel blue flowers and stems. 2½ feet-----	1.50

ERYSIMUM <i>Linifolium</i> —Branching bushlet with large purple blossoms all summer long -----	2.50
<i>Nanum</i> —Dwarf variety with heads of pale yellow -----	1.25
<i>Jumilum</i> —One of the best. Tufts of foliage covered with bright yellow blossoms -----	2.50
<i>Purpureum</i> —Dwarf, half shrubby plant with flowers of lovely purple. 3 inches to 6 inches high -----	3.00
GALIUM <i>Vernum</i> —Erect, feathery plant with racemes of lovely golden yellow flowers -----	1.50
GENTIANA <i>Acaulis</i> —Big blue trumpets over evergreen mats. A beauty and very scarce -----	.75 each
<i>Altaica</i> —Beautiful little species, sending up countless stems, each carrying a single great violet-blue bell -----	.75 each
<i>Brachyphylla</i> —The high alpine form of <i>G. verna</i> . Neat tufts of pale green, covered with almost stemless blossoms of sky blue. July and August -----	.75 each
<i>Cruciata</i> —Deep blue flowers in clusters. 1 foot -----	6.00
<i>Farreri</i> —Grassy mats of foliage covered with silvery blue blossoms with white throat. One of the choicest alpine -----	.75 each
<i>Purdomyi</i> —Procumbent growth with large open trumpets of intense sapphire blue -----	3.50
<i>Rochellii</i> —Stiff little rosettes of leaves with upstanding wide open trumpets of lovely azure blue -----	6.00
<i>Septemfida</i> —Clustered heads of blue on 9 inch stems. Easy -----	3.00
GLOBULARIA <i>Cordifolia</i> —Makes flat mats of dark green foliage covered fluffy balls of steel blue -----	2.00
<i>Nudicaulis</i> —Heads of grey blue balls on 6 inch stems -----	1.75
GYPSOPHILA <i>Cerastioeides</i> —Mats of green foliage covered with showy blossoms of white veined purple -----	2.00
<i>Sundermanni</i> —Hybrid between <i>G. repens</i> and <i>G. cerastioeides</i> . Lovely large white blossoms in ample profusion -----	2.00
HABERLEA <i>Ferd. Coburgi</i> —A very fine form of <i>H. rhodopensis</i> . Blooms resemble a small <i>Gloxinia</i> —lilac color with wide open throat speckled gold -----	1.00 each
HELIANTHEMUM <i>Hybrids</i> —Low growing, shrubby plants for sunny spots. Covered in June and July with crinkled blossoms in almost every color. Three year old plants -----	1.50
HERNARIA <i>Glabra</i> —Dwarf carpenter. Beautiful green foliage -----	1.75
HOUSTONIA <i>Coerulea</i> —Lovely carpenter covered with pale blue stars on 3 inch stems -----	1.75
<i>Serpyllifolia</i> —A larger variety with deeper blue blossoms -----	1.75
HOLLYHOCK —Double Allegheny Pink—Very double center with a large frill of petals, all a beautiful shade of clear rose pink. Large plants -----	1.00
HUTCHINSIA <i>Alpina</i> —Lovely alpine for cool banks. Mats of deep green with dainty white flowers in May to July. Very choice -----	2.50
HYPERICUM <i>Fragile</i> —Trailing variety with stems about 5 inches long, ending in flowers of pure gold -----	3.00
<i>Olympicum</i> —Flopping growth of blue-grey foliage ending in three or four huge blooms of golden yellow -----	3.00
<i>Patulum Forrestii</i> —One of the finest shrubby varieties. Huge golden blossoms. Great improvement over <i>H. Henryi</i> . 2 feet high --	2.50
<i>Polyphyllum</i> —Trailing growth. Golden yellow blossoms in abundance	2.00
<i>Reptans</i> —Large soft yellow globes, stained mahogany on reverse of petals. Prostrate growth -----	2.00
IBERIS <i>Gibraltarica</i> —Shrubby growth with flowers of white and lavender --	2.00
<i>Pruiti</i> —Low bushlet forming a central rosette from which spray 6 inch stems bearing heads of pure white flowers -----	2.00

IRIS SPECIES.

<i>Bulleyana</i> —Grassy species from China. Allied to <i>Sibirica</i> but much dwarfer. Lovely shade of blue. Rare. 1 foot	.75 each
<i>Chamae-iris</i> —Flowers yellow. Very dwarf	1.50
<i>Chrysographes</i> —Flowers lovely, deep velvety violet-purple. Very rare	1.00 each
<i>Douglasiana</i> —Choice Iris with evergreen foliage. About 2 feet tall bearing large flowers from lavender to violet	4.00
<i>Forrestii</i> —Striking variety from China. Grassy foliage. Flowers yellow with slight netting at throat. 18 inches	.75 each
<i>Graminea</i> —Close growing tufts with flowers of violet blue. Deliciously scented	.40 each
<i>Setosa</i> —Distinct. Broad falls of deep lilac on stems about 1 foot high	3.00
<i>Tenax</i> —Bright claret flowers with purple veins. 9 inches	.50 each

IRIS GERMANICA.

<i>Albert Victor</i> —S. Soft blue. F. Lavender. 40 inches	1.50
<i>Blue Boy</i> —Intense blue. 30 inches	2.00
<i>Col. Candelot</i> —Bronze with falls of rich crimson. 3 feet	1.50
<i>Dalila</i> —S. Flesh white. F. Rich red-purple. 2 feet	2.50
<i>Darius</i> —S. rich yellow. F. Purple on white, margined primrose, 18 inches	1.50
<i>Dawn</i> —Beautiful sulphur yellow veined bronze	1.50
<i>Dora Langdon</i> —S. Pale lavender, suffused yellow. F. Rich red-lilac, edged yellow	1.75
<i>Her Majesty</i> —S. Rose pink. F. Bright crimson	1.25
<i>Lohengrin</i> —Soft shade of rose. Very large. 3 feet	1.50
<i>Mad. Chabaut</i> —Wine red on palest yellow. 3 feet	1.75
<i>Mrs. Tinley</i> —Intense violet blue. 3 feet	1.75
<i>Mrs. W. E. Fryer</i> —S. White shaded heliotrope. F. purple crimson 32 inches	1.75
<i>Nine Wells</i> —S. Light blue. F. Deep violet purple. 4 feet	1.75
<i>Princess Beatrice</i> —Very fine form of <i>Pallida Dalmatica</i> . Silvery blue. Strong foliage	1.50
<i>Pauline</i> —S. & F. Rich pansy violet. Very large. 3 feet	1.75
<i>Phyllis Bliss</i> —S. & F. Pale rosy lavender	1.75
<i>Prospero</i> —Vigorous variety with flowers of great substance. Purple violet. 40 inches	1.75
<i>Roseway</i> —Deep reddish pink flowers on strong stems	1.75
<i>Sherwin Wright</i> —Clear golden yellow	1.00
<i>Sweet Lavender</i> —Lovely contrast of pink and blue lavender. 42 inches	1.50
<i>Tamar</i> —Red-lilac. Splendid grower. 4 feet	1.75
<i>Tom Tit</i> —Gay little blue-purple Iris for front of border	1.75
<i>Tristram</i> —S. Clearest white. F. Deep rich purple	2.00
<i>Walhallia</i> —Purple shaded blue. Free bloomer	1.50
<i>Wyomissing</i> —S. Creamy white, flushed rose. F. Deep rose	1.50
<i>Sibirica Emperor</i> —Deep violet blue. Very fine. 4 to 5 feet	3.00
<i>Perrys Blue</i> —Beautiful shade of porcelain blue	3.00

JASIONE Perennis—Very dainty, like a dwarf Scabious, with fluffy heads of azure blue on 4 inch stems. 2.00

LEONTOPODIUM Alpinum Himalaicum—An improved form, blooming later in the season. Excellent for a dry, sunny spot. This is the much-sought Edelweiss. 1.75

LINUM Tenuifolium—A furry, fine-leaved species with rosy-lilac or pink flowers. Very choice. 3.50

LYSIMACHIA Nummularia—(Creeping Jenny)—Valuable ground cover for sun or shade. Showy yellow blossoms. 1.00

LYCHNIS Alpina—Neat little tuft with heads of rose pink flowers on stems of 3 to 6 inches. 1.50

LUPINUS—Downer's Hybrids—True strain of these most famous hybrids. Wonderful range of colors from white through blues and purples to pinks and deep reds. Spikes of bloom two feet long. Finest to be obtained anywhere. Large plants. 3.00

RAMONDIA	Pyrenaica —Densely hairy rosettes, throwing scapes of exquisite violet blossoms. Plant in rocks facing north. Large plants -----	.50 each
	Nathaliae —The Carpathian form with larger blossoms and deeper color. Large plants -----	.75 each
RANUNCULUS	Lingua —Splendid water plant with long foliage and tall stems of 3 feet, with abundant large blossoms of golden yellow -----	2.00
	Montanus —From the highest alpine lawns. Large golden blossoms in May and June and again in Autumn -----	1.75
SAXIFRAGA	Aizoon —Lovely silvered rosettes with sprays of white blossoms. 6 inches -----	3.75
	Apiculata —Mats of spiny rosettes covered in early spring with bunches of primrose yellow flowers on 3 inch stems -----	4.00
	Bathoniensis —One of the best of the mossy section. Deep red blossoms on slender stems of 6 inches -----	2.50
	Balcana —Incurved rosettes with heavily silvered edges. Sprays of white blossoms, speckled purple -----	3.75
	Canaliculata —A beautiful mossy from the Alps of Calabria. Dark green cushions of foliage with erect trusses of pure white flowers -----	3.00
	MACNabiana —The easiest of the encrusted section. Large rosettes of silver edged foliage, throwing long plumes of white flowers in July -----	2.50
	Mossy —Lovely cushions of cool green bearing flowers in various shades of pink and red—also white. Lovely for rather damp, semi-shaded positions -----	1.75
SCABIOSA	House's Hybrids —The true strain of named varieties that has made these lovely plants famous the world over -----	2.50
SEDUM	Anglicum —Choice variety with feathery pink blossoms -----	1.75
	Corsicum —Form of dasyphyllum. Spraying branches of blue-green foliage. White flowers tinted rose color -----	1.75
	Ewersi —Very attractive grey foliage and rosy lilac flowers -----	1.75
	Forsteri —Glaucous blue foliage, trailing growth. Flowers yellow -----	1.50
	Glaucum —Dwarf variety with glaucous blue foliage. Pinkish white blossoms -----	1.50
	Kamtschaticum —Orange yellow flowers in great profusions during June and July. 6 inches -----	1.25
	Sedum Laggeri —Attractive species about 1 foot high with orange yellow blossoms -----	1.25
	Roseum —Beautiful little mat of leaves with rosy pink blossoms in great profusion -----	1.75
	Stoloniferum —Long stems, blunt leaves, ending in heads of pink blossoms -----	1.25
	Telphium Borderi —Very dwarf with heavy, blue-green foliage. Attractive variety for both rock garden and border edge -----	1.50
SEMPERVIVUM	Arachnoideum —Clusters of rosettes having leaves joined tip to tip with white cobwebby threads. Handsome crimson flowers. True variety -----	1.50
	Braunii —Pointed leaves forming open rosettes of brilliant green, sometimes red at tips. Slender stems 4 inches high ending in a cluster of rich yellow flowers. Scarce -----	1.25
	Calcareum —Large rosettes of glaucous green with red tips. Very handsome, rare -----	2.50
	Funckii —Brilliant green rosettes, holding color even in winter. Sprays of pale pink flowers -----	1.00
	Globiferum —Bright green leaves, making incurved rosettes. The young offsets are rolled into small balls. Erect pale yellow flowers -----	1.00
	Pittonii —Tongue shaped leaves tipped purple. Rare and handsome -----	2.50
	Rubicundum —Large rosettes of dull red leaves, tipped green. Very fine -----	2.50
	Tectorum —Common house-leek or "Hen and chickens." Large green rosettes, pale red flowers -----	1.00
	Triste —Bronzy green foliage, purplish flowers. Distinct -----	1.25

WOLCOTTS LIMITED.
Landscape Architects and Engineers
Builders of Fine Gardens
Jackson, Michigan

Thank you for your inquiry of recent date. Under separate cover we are sending you copy of our lowest price list.

It was our intention to put out a new list this Spring, in which the prices would of necessity be higher. But we have decided to leave the prices at their present level for this season.

You will appreciate this as a real bargain list and hope you will take advantage of the opportunity to buy at these prices as they cannot keep in force very long under the conditions of the Nursery code and still send out good plants.

Trusting we may have the pleasure of serving you and assuring you of our best attention at all times, we are,

Very truly,

MW/-

WOLCOTTS LIMITED.

	Dozen
SILENE Acaulis —High alpine. Close green cushions spangled with pink, stemless flowers in June. Very choice-----	3.50

Teucrium "Royal Blue" —Large flowers of brilliant deep blue on stems of 9 inches. True variety-----	1.50
True Blue —Very handsome with brilliant blue flowers late in summer. 1 foot-----	1.50

Some time ago we developed a wire mesh pot which is soft and flexible. They were designed especially for alpine and to be planted pot and all—the wire eventually rusting away in the soil and producing a beneficial plant food.

After exhaustive experiments, we believe our “Gropot” (patent applied for), will produce results in the growth and development of plants way beyond any pot on the market. In fact, many extremely difficult subjects show surprising growth in these pots.

Our past experience with paper, peat and crockery pots proved that alpine, at least, did not thrive in any of these types. The same plants under precisely the same conditions, grown side by side, show a marked improvement in “Gropot” over any other type.

We will ship any of our stock planted in “Gropot” at an extra charge of 50c per dozen.
